Using Mac:

1. Visit https://www.fortinet.com/support/product-downloads and locate the Forticlient VPN located towards the bottom of the page and select the (Download for MacOS) option.

![FortiClient VPN](image)

2. Open and run the downloaded FortiClient.dmg file which will proceed to download the FortiClientUpdate package.

![Downloads](image)
3. **Run** the newly downloaded **FortiClientUpdate** package. It will ask for permission to download and install the app.

4. **Proceed** with the installation wizard, choosing install destination and accepting license agreements. Finally, click **install**.
Standard Install on "Macintosh HD"

This will take 186.7 MB of space on your computer.

Click Install to perform a standard installation of this software for all users of this computer. All users of this computer will be able to use this software.
5. After a successful installation, it will ask for permission to add **FortiTray VPN Configurations** to your device. Click **Allow** and proceed.

6. After it has been installed, search Finder for the newly installed **FortiClient**. Once the Client is open click the box located next to the acknowledged agreement and click “I accept”.
Welcome to FortiClient VPN!
This is a free version of FortiClient VPN software with limited feature support. Please upgrade to the licensed version for advanced features and technical support.

I acknowledge that this free software does not come with any product support. I will not contact Fortinet technical support for any issues experienced while using this free software.

I accept
